NASA SEWP VI

Contract Holder

SEWP VI OVERVIEW

NASA SEWP VI – The NASA SEWP (Solutions for Enterprise-Wide Procurement), pronounced "soup", provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors. Created in 1993, SEWP I was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. Originally, the contract vehicle provided only technology products for NASA and all other agencies. SEWP has continually evolved over the past 30 years, expanding its scope to meet the requests of its customers. The SEWP vehicle represents acquisition innovation within the Federal Government. The program is self-funded through usage fees (0.34%) and provides all Federal agencies with acquisition support - more than 50,000 orders a year.

FAIR OPPORTUNITY

FAR 16.505(b) (1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding $10,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the Contracting Officer (CO) and that the CO must document the rationale for placement and price of each order. Using the SEWP online Quote Request Tool is the recommended method to assist in this activity and to augment the required decision documentation. The SEWP Quote Request Tool (QRT) will automatically include the Contract Holders within a selected Category or based on a suggested source.

About ARES

ARES Corporation provides program management, technical, and mission support services to the federal government.

ARES CATEGORY B CONTRACT – ENTERPRISE-WIDE STRATEGIC SOLUTIONS

ARES's NASA SEWP VI Category B contract provides customized enterprise-wide strategic solutions to support complex requirements across federal agencies. Category B is designed for large-scale requirements spanning multiple departments, locations, customers, and/or field offices.

ARES CATEGORY B CAPABILITIES

Enterprise-Wide Network Services
Network architecture, engineering, monitoring, security, lifecycle management, and modernization.

IT Managed Services
Enterprise end-user support, device management, service desk support, and managed IT operations.

Enterprise-Wide Innovation Services
Emerging technology assessment, solution development, modernization, and innovative enterprise solutions.

IT Service Management
ITIL-based service management, incident, problem and request management, service catalogs, and enterprise ITSM tools.

Enterprise Service Program Integration
Integrated planning, agile service delivery, governance, portfolio management, and cross-enterprise coordination.

Enterprise-Wide Information and Data Analytics Services (IDAS)
Enterprise data architecture, data platforms, analytics, data science, artificial intelligence, machine learning, and visualization.

Enterprise-Wide Application Services/ Software Development
Application assessment, design, development, integration, testing, DevSecOps, deployment, maintenance, and operational support.

Enterprise-Wide Cybersecurity Services
Cybersecurity architecture and engineering, risk management, continuous monitoring, vulnerability management, incident response & security assessments.

Enterprise-Wide Cloud Services
Cloud strategy, architecture, migration, implementation, governance, security, compliance, hosting, and operational support.

Enterprise-Wide Digital Multimedia and Technical Communications Services
Multimedia engineering, web and social media support, broadcasting, audiovisual services, publishing, imagery, and technical communications.

Program Management/Ancillary Services and Supplies
Program management, integration, transition, logistics, administrative support, and ancillary services & supplies necessary to support innovative enterprise solutions.

ORDERING PROCESS

1	2	3	4	5
Define the Requirement	**Conduct Market Research/ Request Quotes**	**Agency Issues the Order**	**SEWP PMO Processes the Order**	**ARES Performs The Work**
The customer identifies its enterprise-wide service requirement and prepares a Purchase Request (PR).	The Quote Request Tool (QRT) is the recommended method.	The ordering office evaluates responses and issues a Delivery Order (DO) using its applicable procurement documentation.	NASA SEWP reviews and processes the order and assigns the SEWP Control Number (SCN).	ARES begins performance after SEWP processing is complete and an SCN has been assigned.

Important Customer Notes

- Agency procedures may vary. The ordering Agency is responsible for its internal procurement process.
- Order modifications must also route through the NASA SEWP Program Management Office (PMO).
- For quote requests, installation, warranty, technical or software support, post-delivery assistance, or troubleshooting of a problematic order, please contact the appropriate ARES SEWP VI representative listed on Page 1.
